Industry 4.0

High Standards of Connectivity and Technological Infrastructure

Access to 3 large fiber optic networks, extended from northernmost Chilean City-Arica- (near Peruvian border) till the southern city of Puerto Montt.

Reaching country's main urban areas and economic development poles, by over 18,000 kmts. length all fibers together.

Energy Security & Sustainability

- Chile offers clean energy sources for its operations.
- Chile is the 4th most attractive country in the world to invest in renewable energies (E&Y, 2016).
- At 2015 figures, 41% of electricity was generated from renewable sources.
- The contribution of these new generation sources has allowed Chile to reduce energy costs by more than 60% in the last 3 years.
